

SRI Biosciences™

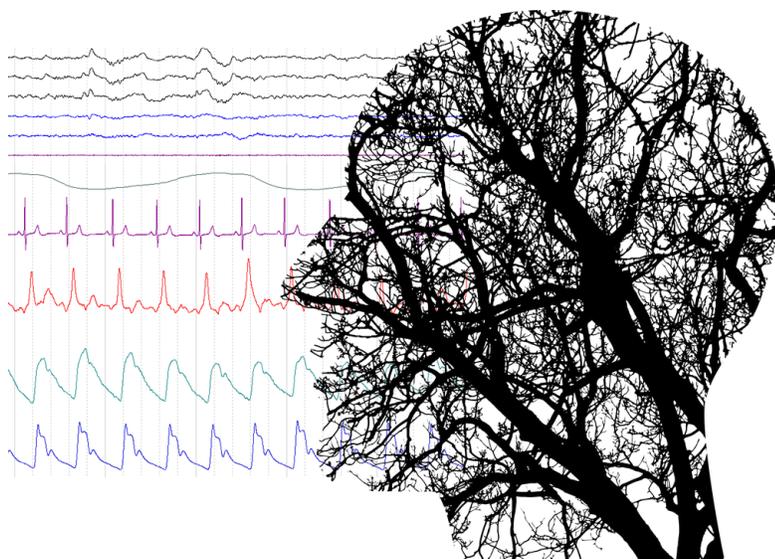

A DIVISION OF SRI INTERNATIONAL

POSTDOCTORAL FELLOW JOB ID# 1776BR

Menlo Park, CA, USA

This postdoctoral fellow is full time and expected to last one year, renewable upon mutual agreement. We anticipate a start date of September 2018.

A post-offer, pre-laboratory physical examination may be required. Candidates who receive a conditional offer of employment will be subject to a background check.

Job Description

The successful applicant will primarily work on a project about sleep, central and autonomic nervous system functioning in adolescents, with a focus on the pathophysiological mechanisms underlying insomnia.

The successful applicant will be expected to complete all the aspects of the project (data collection, reduction and analysis, data presentation, preparation of manuscripts for publication), and develop new research initiatives.

Opportunities to pursue independent funding (e.g., through NIH grant proposals) will be provided and encouraged.

About SRI Biosciences

SRI Biosciences, a division of SRI International, integrates basic biomedical research with drug and diagnostics discovery and preclinical and clinical development. SRI International, a research center headquartered in Menlo Park, California, creates world changing solutions to make people safer, healthier, and more productive.
