Postdoctoral Scholar in Sleep-Metabolism Research, University of Chicago

A position is available immediately for a highly motivated and detail-oriented postdoctoral scholar in the lab of Esra Tasali, MD, Associate Professor of Medicine and Director of the Sleep Research Center at the University of Chicago. The researcher will be involved in an NIH-funded project focusing on understanding systemic and cellular pathways in the link between sleep apnea and impaired glucose metabolism.

A successful applicant will have the ability to function with independence in novel techniques of (training will be provided) and be comfortable working closely with other lab members, research personnel and human research subjects. The project involves close collaborations with other laboratories in the Departments of Medicine as well as outside major academic institutions in the US.

Salary will follow NIH guidelines commensurate with training and experience.

MINIMUM QUALIFICATIONS:

- 0-1 year postdoc experience
- Experience working with human subjects
- First author publications in clinical research

PREFERRED QUALIFICATIONS:

- Experience in sleep medicine and/or endocrine research
- Strong analytical, statistical, quantitative skills

To formally apply, please send both of the following documents in PDF format to Becky Tucker (tuckerb@medicine.bsd.uchicago.edu). In the subject line, please indicate your name and "Application for Postdoctoral Scholar":

1. A curriculum vitae, including names of 3 references.
2. A statement describing research interests, current, and future research goals.
